Notes:

*null indicates information which is not available.

Data based on responses from six semiannual panels over a 3-year period. See Technical Notes for additional information. http://www.bls.gov/oes/current/oes_tec.htm

Headings in bold font are the major occupational groups of the Standard Occupational Classification (SOC) system. Major occupational groups of the SOC are a composite of all individual occupations listed below the major group heading. Occupation codes ending in 000 (e.g. 11-1000, 11-2000, 11-3000, etc.) are a summation of all the occupations listed below them.

Annual wages were calculated by multiplying hourly wages by 2080 (52 weeks X 40 hours / week); for those occupations where there is no hourly wage, the annual wage was calculated directly from the survey data. Hourly wages for occupations where workers typically work fewer than 2,080 hours per year are not available.

Prepared by the Arizona Office of Employment and Population Statistics in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics, June 2013.

Notes:

*null indicates information which is not available.

Data based on responses from six semiannual panels over a 3-year period. See Technical Notes for additional information. http://www.bls.gov/oes/current/oes_tec.htm

Headings in bold font are the major occupational groups of the Standard Occupational Classification (SOC) system. Major occupational groups of the SOC are a composite of all individual occupations listed below the major group heading. Occupation codes ending in 000 (e.g. 11-1000, 11-2000, 11-3000, etc.) are a summation of all the occupations listed below them.

Annual wages were calculated by multiplying hourly wages by 2080 (52 weeks X 40 hours / week); for those occupations where there is no hourly wage, the annual wage was calculated directly from the survey data. Hourly wages for occupations where workers typically work fewer than 2,080 hours per year are not available.

Prepared by the Arizona Office of Employment and Population Statistics in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics, June 2013.

Notes:

*null indicates information which is not available.

RSE: The relative standard error is a measure of the reliability of a survey statistic. The smaller the relative standard error, the more precise the estimate.

Data based on responses from six semiannual panels over a 3-year period. See Technical Notes for additional information. http://www.bls.gov/oes/current/oes_tec.htm

Headings in bold font are the major occupational groups of the Standard Occupational Classification (SOC) system. Major occupational groups of the SOC are a composite of all individual occupations listed below the major group heading. Occupation codes ending in 000 (e.g. 11-1000, 11-2000, 11-3000, etc.) are a summation of all the occupations listed below them.

Annual wages were calculated by multiplying hourly wages by 2080 (52 weeks X 40 hours / week); for those occupations where there is no hourly wage, the annual wage was calculated directly from the survey data. Hourly wages for occupations where workers typically work fewer than 2,080 hours per year are not available.

Prepared by the Arizona Office of Employment and Population Statistics in cooperation with the U.S. Department of Labor, Bureau of Labor Statistics, June 2013.
